Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3632

This is the non-final Office Action for the serial number 10/709,814, BATHROOM ACCESSORY MOUNTING ASSEMBLY AND METHOD OF MOUNTING, filed on 5/28/04.

The allowability claim 18 has been considered and withdrawn in view of new ground rejection, any inconvenience is regretted.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 17 is rejected under 35 U.S.C. 102(b) as being anticipated by US Patent # 5,145,135 to Thompson.

Thompson teaches a bathroom accessory mounting assembly comprising a mounting subassembly (20), a post (38) and a functional member (38) connected to the post. The mounting subassembly comprises a mounting bracket (50). The post is connected to the mounting subassembly by alignment of the post with the mounting subassembly and movement of the post along the mounting subassembly solely in an axial direction until a portion of a snap flange (54) located on the mounting bracket snaps into a recess (56) formed through the post. The snap flange is being engageable from the exterior of the post to release the connection of the post to the mounting bracket. The functional member is a bar.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 19-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Thompson.

Thompson teaches the post and mounting bracket having toroidal portions and the mounting bracket further comprises one rib (52) located on the axially extending body portion but fails to teach wherein the inner diameter of the post is slightly larger than the outer diameter of the axially extending body of the mounting bracket., however in figure 7 of Thompson's invention which is a different embodiment shows that the inner diameter of the post is slightly larger than the outer diameter of the axially extending body of the mounting bracket. It would have been obvious for one of ordinary skill in the art at the time the invention was made to have modified the inner diameter of post larger than the outer diameter of the axially extending body of the mounting bracket to provide alternative method for connecting the post and mounting bracket together.

***Response to Arguments***

Applicant's arguments with respect to claims 17 and 19-20 have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***
